Dr. Chesky participates in Make Listening Safe Initiative at WHO Headquarters

February 2019 – Geneva Switzerland

TCPAH founding Co-Director Dr. Kris Chesky participated in a meeting at the World Health Organization headquarters in Geneva. As a consultant to the Make Listening Initiative that was launched in 2015, Chesky brought perspectives as a musician, researcher, and music educator.

The broad goals of this project include the development and implementation of global standards for safe listening devices, undertaking a public health campaign for listening behavioral change, and to develop a regulatory framework for control of recreational sound exposure.

This project is in response to estimations that over a billion young people worldwide are at risk for hearing loss due to unsafe listening practices.
